PROFESSIONAL SUMMARY

Computer Science undergraduate focused on Java Full Stack Development with hands-on experience building RESTful APIs using Java and Spring Boot, developing interactive frontends with React, and working with PostgreSQL and MongoDB. Experienced in implementing authentication, designing database schemas, and developing scalable full-stack web applications. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, and full-stack application development.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering **2023 – 2027**
JSS Academy of Technical Education, Bengaluru **CGPA: 8.43**

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C
Backend: Spring Boot, Spring MVC, Spring Data JPA, RESTful APIs, JWT, Spring Security
Databases: PostgreSQL, MongoDB, MongoDB Atlas, MySQL
Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS
Tools: Git, GitHub, Maven, Postman, VS Code
Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS

PROJECTS

Memento *October 2026*

Java 21 | Spring Boot 3 | Spring AI | PostgreSQL 16 + pgvector | React | TypeScript | JWT

- Built a full-stack Retrieval-Augmented Generation (RAG) application where users upload PDF, DOCX, and TXT documents and ask questions through an AI chat assistant that cites retrieved source chunks.
- Parsed and chunked uploaded documents with Spring AI, generated embeddings using local Ollama support, and stored vectors in PostgreSQL 16 using pgvector.
- Implemented token-by-token chat streaming over authenticated Server-Sent Events (SSE), including token, citation, and completion events.
- Secured knowledge-space, document, and chat endpoints using JWT and Spring Security; built the frontend with React, TypeScript, Vite, Tailwind CSS, and Zustand.

JobNova *July 2026*

React.js | Spring Boot | MongoDB Atlas | JWT | Serper API

- Developed a full-stack job portal with role-based dashboards for recruiters and candidates, supporting job posting, job search, applications, and application tracking.
- Integrated the React frontend with 15+ Spring Boot REST APIs backed by MongoDB Atlas for authentication, job management, and application workflows.
- Implemented JWT-based authentication and role-based access control, integrated the Serper API for job-related search and insights, and deployed using Vercel, Render, and MongoDB Atlas.

JeevantaX *September 2026*

React.js | Spring Boot | MongoDB Atlas | Gemini API | OpenStreetMap API | Telegram Bot

- Developed a full-stack healthcare platform with appointment scheduling, electronic health records, and role-based dashboards using React.js and Spring Boot.
- Integrated Gemini API for AI-assisted symptom analysis, OpenStreetMap for nearby hospital discovery, and a Telegram bot for appointment reminders.
- Implemented CRUD operations, authentication, and REST API integration to connect the frontend, backend, and database.

ACHIEVEMENTS

- Secured **3rd Place** in the hackathon at JSS Academy of Technical Education by developing **ReferAI**, an AI-powered employee referral platform.
